No.G.10.

### MODEL A.10. SIDECAR FORK SPRINGS.

To ensure satisfactory suspension on A.10 motor-cycles used in conjunction with large double adult sidecars extra heavy fork springs have been introduced.

The springs, Part No.42-5145 are available for delivery from stock from Spares Department.

These springs are additional to the wide range of springs already available - see Parts Service Bulletin No.G.4. dated June, 1958.
