

JULY 1971

No. 24/71

# Service sheet

B.S.A. Motor Cycles Limited,  
Service Department, Armoury Road,  
Birmingham, B11 2PX.

## EXHAUST SYSTEM

B50 MX

A limited number of the first B50 MX models to be despatched had a condition whereby on full compression of the rear suspension, the megaphone silencer fouled the rear wheel spokes.

To rectify, deform the outlet end of the megaphone cone by compressing in a clamp or vice to make the outlet oval and measure  $1\frac{1}{4}$ " across. Secondly, fit a  $\frac{1}{4}$ " distance piece between the megaphone bracket and its fixing point on the frame.

Top view of megaphone silencer

*LIMITED ISSUE*

Outlet of megaphone silencer  
to be parallel with spokes.
