ENERGY TRANSFER EXCHANGE CONVERSION

= SPECIAL DEALER NOTICE =

AN EXCHANGE CONVERSION SET-UP WITH 6-POLE STATOR PLATE ASSEMBLY WILL SHORTLY BE AVAILABLE ON A NO-CHARGE, FREE OF COST BASIS FOR C15S STARFIRE SCRAMBLER MODELS SOLD DURING 1960 COMMENCING WITH ENGINE NO. C15S-345 THROUGH ENGINE NO. C15S-1999.

If your customer list includes any owners through this engine number range who have been experiencing starting difficulties this conversion set should assure them complete satisfaction. It affords considerably increased current and thus makes the Energy Transfer system more tolerant insofar as finite timing is concerned.

THIS UNIT IS NOW STANDARD EQUIPMENT ON ALL C15S STARFIRE SCRAMBLER MODELS IN WAREHOUSES.

It has been on test for a considerable period of time and field reports indicate complete satisfaction and excellent service.

IF YOU HAVE OWNERS EXPERIENCING STARTING DIFFICULTIES YOUR ORDERS SHOULD BE PLACED IMMEDIATELY. WHILE IMMEDIATE DELIVERY CANNOT BE ACCOMPLISHED YOUR BACKORDERS ARE SOLICITED AT THE EARLIEST POSSIBLE DATE FOR DELIVERY PRIORITY. SHIPMENTS ARE ESTIMATED TO COMMENCE IN ABOUT SEVEN WEEKS.

The standard replacement procedures will apply, the replacement units being supplied on your regular billing basis on the standard terms applicable to your account. Upon return of the old stator plate, postage paid and accompanied by a properly completed replacement tag, an offsetting credit will be issued your account.

Early attention is recommended. This replacement offer expires 1 Sept 1961.
