PLATINUM MAGNETO CONTACT POINTS FOR

SUPER ROCKET ENGINES

Platinum contact points have been made available to assure positive ignition current at high engine R.P.M.

It is recommended that the Platinum Points be assembled in the early Super Rocket magneto when there is mis-firing at high speed or when difficulty is experienced in obtaining high speed performance.

The platinum points are supplied in a set consisting of the breaker arm and contact point screw, also supplied in a complete Contact Breaker Assembly and can be ordered from our Parts Department according to the numbers listed below.

| <u>Part Number</u> | <u>Description</u> | <u>List Price</u> |
|--------------------|--------------------------------|-------------------|
| 54440863 | Contact Breaker Assy. Complete | 9.15 |
| 54440890 | Contact Point Set | 5.85 |

The 1961 Super Rocket Magnetos are equipped with Platinum Contact Points.

Yours very truly,
BSA Incorporated
